Use of AI

I used ChatGPT-4o to classify the open-ended fields. I independently classified the open-ended fields myself manually and judged the manual classification of better quality, so I do not use AI classification in the main analysis.

I used Claude Sonnet 4.6 to proofread the text's English style and to shorten it so it fits into the 10k words requirement.

I did not use AI for any other task (in particular, I did not use AI for coding or writing).
