3 Discussion

Methods

Pre-registration. The project is approved by Economics & Business Ethics Committee (EBEC) at the University of Amsterdam (EB-1113) and was preregistered in the Open Science Foundation registry (osf.io/fy6gd). The study did not deviate from the registration: the questionnaires and the hypotheses tests used are the same as the ones *given ex ante*. Informed consent was obtained from all respondents, randomized treatment branches were unknown to the respondents, and our research complies with all relevant ethical regulations. Respondents were compensated with gift certificates for a value of €1 after participation. No statistical methods were used to pre-determine sample sizes but our sample sizes match those reported in similar publications. (Dechezleprêtre et al. 2025; ISSP 2010; Beiser-McGrath and Bernauer 2019; Sivonen 2022; Douenne and Fabre 2022)

Data collection. The paper utilizes two sets of surveys: the *global* survey and the *Western* surveys. The *global* surveys consist of two U.S. surveys, *US1* and *US2*, and one European survey, *Eu*. The *global* survey was conducted from March 2021 to March 2022 on 40,680 respondents from 20 countries (with 1,465 to 2,488 respondents per country). *US1* collected responses from 3,000 respondents between January and March 2023, while *US2* gathered data from 2,000 respondents between March and April 2023. *Eu* included 3,000 respondents and was conducted from February to March 2023. We used the survey companies *Dynata* and *Bilendi*. To ensure representative samples, we employed stratified quotas based on gender, age (5 brackets), income (4), region (4), education level (3), and ethnicity (3) for the U.S. We also incorporated survey weights throughout the analysis to account for any remaining imbalances. These weights were constructed using the quota variables as well as the degree of urbanization, and trimmed between 0.25 and 4. Stratified quotas followed by reweighting is the usual method to reduce selection bias from opt-in online panels, when better sampling methods (such as compulsory participation of random dwellings) are unavailable. Scherpenzeel (2010) By applying weights, the results are fully representative of the respective countries along the above mentioned dimensions. Results at the European level apply different weights which ensure representativeness of the combined four European countries. Appendix C shows how our samples compare to actual population frequencies. They match the actual frequencies, except for some imbalances in specific quota demographics —such as gender in the UK (43% of women instead of 50%) or urbanity in Spain (15% rural instead of 26%)— that are corrected through our survey weights, and in the U.S. vote (which does not affect our results, as shown by the results reweighted by vote in the *Support for the GCS* section below). Appendix H shows that the treatment branches are balanced. Appendix I runs placebo tests of the effects of each treatment on unrelated outcomes. We do not find effects of earlier treatments on unrelated outcomes arriving later in the survey. Appendix L shows that our results are unchanged when including inattentive respondents.

Data quality. The median duration is 28 minutes for the *global* survey, 14 min for *US1*, 11 min for *US2*, and 20 min for *Eu*. To ensure the best possible data quality, we exclude 14% respondents who fail an attention test or rush through the survey (i.e., answer in less than 11.5 minutes in the *global* survey, 4 minutes in *US1* or *US2*, 6 minutes in *Eu*). At the end of the survey, we ask whether respondents thought that our survey was politically biased and offer to provide some feedback. 69% of the respondents found the survey unbiased. 24% found it left-wing biased, and 8% found it right-wing biased.

Questionnaires and raw results. The raw results are reported in Appendix A while the questionnaire is given in Appendix app:questionnaire.

Data and code availability

All data and code of the *global* surveys as well as figures of the paper are available on [10.5281/zenodo.11202245](https://doi.org/10.5281/zenodo.11202245). Data and code for the *g* survey will be made public upon publication.

Figure 4: Preferred split of revenue of an international wealth tax. The first two items are from the variant *Few* with 5 fixed items (the *Global* one and the most preferred one are displayed); the last four items are from the variant *Many* with 5 items taken at random out of 13 (the 4 *Global* ones are displayed). (Questions 24-25)

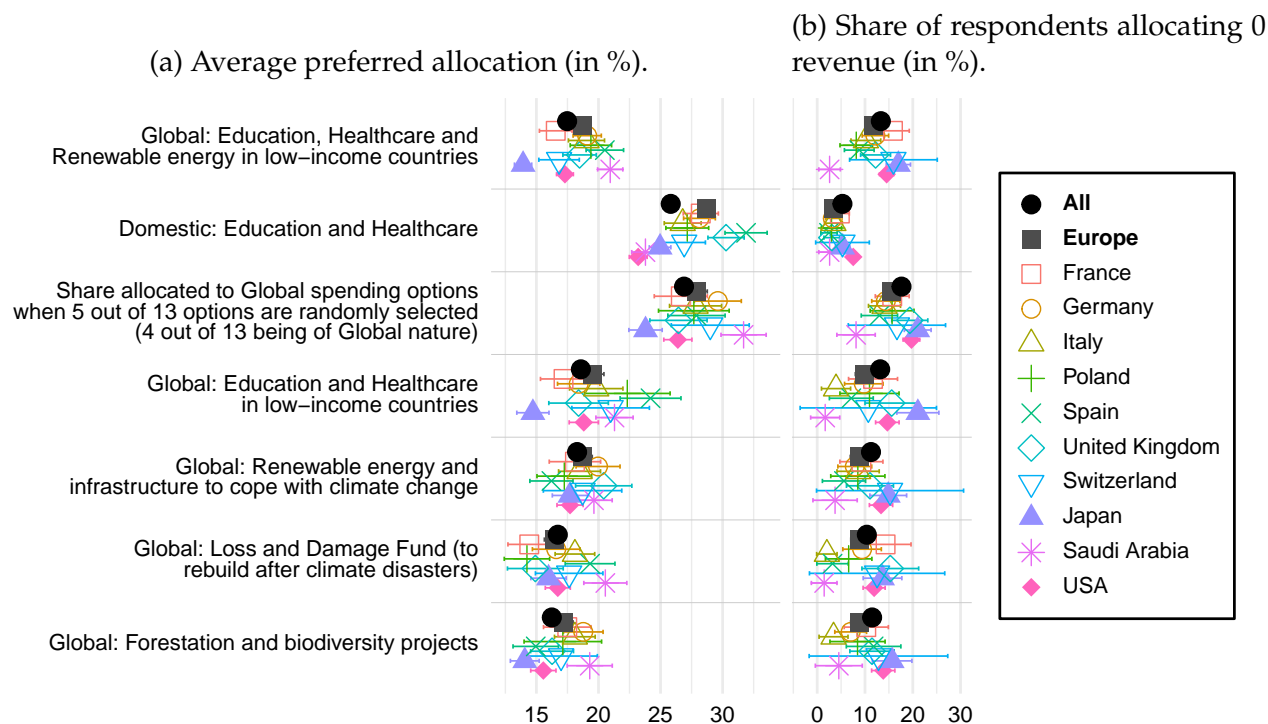

Figure 5: Support for the National, Global, and International Climate Schemes (Yes/No question). (Questions 26-35).

Figure 6: Support for an international wealth tax with 30% of revenue funding LICs, depending on the country coverage (Yes/No question). (Questions 41-43).

Figure 7: Effect on the likelihood that a political program is preferred of containing the following policy (compared to no foreign policy in the program). (Question 23)

Figure 8: Testing warm glow (negative effects would indicate the presence of warm glow).

(a) Effect of a *Donation lottery* treatment on support for the Global Climate Scheme. (Questions 27-28)

(b) Effect of information about ongoing global redistribution initiatives on the share of plausible global policies supported. (Questions 36-38)

Figure 9: Relative support for plausible global redistribution policies (Percentage of *Some-what* or *Strongly* support among non-*Indifferent* responses). (Question 38).

	All	Europe	France	Germany	Italy	Poland	Spain	United Kingdom	Switzerland	Japan	Saudi Arabia	USA
Minimum tax of 2% on billionaires' wealth, in voluntary countries	81	84	87	83	89	79	81	85	77	81	86	77
Bridgetown initiative: MDBs expanding sustainable investments in LICs, and at lower interest rates	79	82	81	81	88	72	81	85	75	80	87	74
L&D: Developed countries financing a fund to help vulnerable countries cope with climate Loss and damage	73	75	72	73	84	72	77	72	67	73	89	70
Expand Security Council to new permanent members (e.g. India, Brazil, African Union), restrict veto use	72	76	72	76	80	73	76	78	72	68	84	67
Raise global minimum tax on profit from 15% to 35%, allocating revenues to countries based on sales	71	75	75	74	85	66	70	74	63	72	77	66
International levy on shipping carbon emissions, returned to countries based on population	70	73	78	70	78	61	74	75	72	59	81	67
Debt relief for vulnerable countries, suspending payments until they are more able to repay	69	70	64	60	81	79	72	72	65	68	88	67
At least 0.7% of developed countries' GDP in foreign aid	68	69	66	67	79	59	77	65	64	62	86	67
NCQG: Developing countries providing \$300 bn a year in climate finance for developing countries	65	69	68	69	76	63	73	67	65	59	86	61
International levy on aviation carbon emissions, raising prices by 30%, returned to countries based on population	53	55	62	54	56	53	54	54	51	46	70	51

Figure 10: Support for broad action or radical proposals of global redistribution. (Questions 44-46, 49-51, 53, 61).

	All	Europe	France	Germany	Italy	Poland	Spain	United Kingdom	Switzerland	Japan	Saudi Arabia	USA
Supports tax on world top 1% to finance global poverty reduction (Additional 15% tax on income over [\$120k/year in PPP])	69	72	72	72	84	69	74	67	61	69	81	62
Supports tax on world top 3% to finance global poverty reduction (Additional 15% tax over [\$80k], 30% over [\$120k], 45% over [\$1M])	63	65	70	63	70	70	66	67	41	55	82	58
Prefers sustainable future	68	70	72	70	76	57	74	68	67	76	71	62
"Governments should actively cooperate to have all countries converge in terms of GDP per capita by the end of the century"	71	77	77	75	87	84	84	66	66	70	92	56
Could sign a petition and spread ideas	52	55	53	53	57	54	57	55	48	51	40	50
More likely to vote for party if part of worldwide coalition for climate action and global redistribution	68	72	71	71	82	64	77	69	57	56	NA	67
Supports reparations for colonization and slavery in the form of funding education and technology transfers	46	50	44	44	69	NA	51	46	NA	NA	NA	40
"My taxes should go towards solving global problems"	61	61	43	62	76	62	71	58	53	58	88	55
"My taxes ... global problems" (Global Nation, 2023)	56	59	43	65	76	58	60	52	NA	76	NA	44

Figure 11: "Which group of people do you advocate for when you vote?" (Question 62).

Figure 12: "How do you evaluate each of these channels to transfer resources to reduce poverty in LICs?"

Percentage of *Right* or *Best* way (other options: *Wrong* or *Acceptable* way). (Question 48).

	All	Europe	France	Germany	Italy	Poland	Spain	United Kingdom	Switzerland	Japan	Saudi Arabia	USA
Targeted cash transfers (child allowances, disability & elderly pensions)	46	48	43	46	57	45	54	44	47	36	73	45
Development aid agencies	40	42	42	47	39	32	44	43	44	36	57	37
Government, conditional on financing poverty reduction	37	40	39	43	48	33	41	37	35	27	62	35
Local NGOs with democratic processes	31	33	39	33	34	33	33	29	32	22	53	29
Unconditional cash transfers to each household	30	30	31	27	31	30	34	27	32	24	62	31
Local authorities	22	23	25	22	22	30	23	19	19	18	47	22
Government, unconditional	18	18	21	14	18	22	21	16	14	14	50	18

Figure 13: Average custom global redistribution. (Question 55).

Examples of income changes after your proposed redistribution:

Now	After
0 \$/year	2 215 \$/year
10 000 \$/year	10 115 \$/year
60 000 \$/year	55 793 \$/year
100 000 \$/year	90 965 \$/year
Your <i>individual</i> income	
40 000 \$/year	38 206 \$/year

Proportion of winners: 60% Proportion of losers: 20%

Degree of redistribution: 2

☐ I am satisfied with my custom redistribution.

☐ I want to skip this question.

Figure S8: Conjoint analysis in France (Average Marginal Component Effect). Cf. Figure S17 for French. (Question 23).

Climate policy:

Build 14 new nuclear reactors

Abolish Low Emission Zones (ZFE) that restrict car access in cities

Economic issues:

Fully index pensions to inflation

Raise the minimum wage to 1,600 euros net per month

Restore the legal retirement age to 62

Foreign policy:

International tax on millionaires with 30% financing healthcare and education in low-income countries

Cut development aid

Double military budget by 2030

Social issues:

Abolish birthright citizenship

Impose mandatory sentences for repeat offenders, and lower the age of criminal responsibility to 16

Establish the Citizens' Initiative Referendum (RIC)

Tax system:

Tax-free bonuses of up to €10,000 per year

Exempt individuals under 30 from income tax

Reduce income tax up to €4,000/month net and increase it above that

Reinstate a reinforced wealth tax

Figure S9: Conjoint analysis in Germany (Average Marginal Component Effect). Cf. Figure S18 for German. (Question 23).

Figure S10: Conjoint analysis in Italy (Average Marginal Component Effect). Cf. Figure S19 for Italian. (Question 23).

Climate policy:

Cancel the ban on new combustion-engine cars from 2035

Double the capacity of renewable energy by 2030

Economic issues:

Increase the birth grant to up to €3,600 for newborns

Use unspent EU funds to exempt hiring companies from taxes

Introduce a legal minimum wage at 10€ per hour

Reduce working hours without reducing salaries

Foreign policy:

International tax on millionaires with 30% financing healthcare and education in low-income countries

Cut development aid

Develop a common EU defense

Social issues:

Legal limit on migration and process asylum requests outside the EU

Recognize same-sex marriage

Introduce free and mandatory early education (until 3 years old)

Tax system:

Reduce the income tax on low-income households

Replace the income tax by a 15% flat tax

Figure S11: Conjoint analysis in Poland (Average Marginal Component Effect). Cf. Figure S20 for Polish. (Question 23).

Climate policy:

Phase out coal by 2035

Ban the sale of new combustion-engine cars by 2035

Economic issues:

Expansion of rail production and infrastructure investment

Allocate 5% of GDP to military expenditures by 2030

Foreign policy:

International tax on millionaires with 30% financing healthcare and education in low-income countries

Cut development aid

Detention of rejected asylum seekers until they can be deported

Social issues:

Restoring abortion rights

Relax restrictions on public assembly and protest

Extended parental leave, tax benefits for children, and remote work option

Tax system:

Reduce taxes on low-income households by increasing the tax-free income allowance

Taxes on the profits of large digital corporations and fossil fuel companies

Income tax exemption for seniors delaying retirement

Figure S12: Conjoint analysis in Spain (Average Marginal Component Effect). Cf. Figure S21 for Spanish. (Question 23).

Climate policy:

Extend the social electricity voucher

A national investment plan to enhance water management

Economic issues:

Set the minimum wage at 1350€/month

Reduce the workweek to 36 hours by 2030 without salary cut

Promote flexible working hours through a time bank

Foreign policies:

International tax on millionaires with 30% financing healthcare and education in low-income countries

Cut development aid

Increase support for Ukraine and maintain sanctions on Russia

Social issues:

Strengthen social media regulation for transparency, misinformation control, and verified identity

Free early education (from 0 to 3 years)

Create centers outside the EU to process asylum requests

Tax system:

Lower the income tax on the middle class and increase it on rich households

Abolish the wealth tax and lower corporate tax rates

Reduce taxation in rural areas through the Agricultural Taxation Act

Figure S13: Conjoint analysis in the UK (Average Marginal Component Effect). (Question 23).

Climate policy:

Investment in renewables and nuclear to achieve zero-emissions electricity in 2030

A ban on domestic flights for trips under three hours by train

Economic issues:

30 hours of free childcare per week for working parents

Healthcare plan: more appointments by utilising overtime employment, recruitment in mental care and dentistry coverage

Raising the minimum wage to £15 per hour

A 4-day working week

Foreign policy:

International tax on millionaires with 30% financing healthcare and education in low-income countries

Cut development aid

Deepen Brexit by removing or reforming EU-inherited laws

Social issues:

Legal limit on migration and deportation to Rwanda

Enforce neighbourhood policing through recruitment and new equipment

Increase the Universal Credit for low-income households

Tax system:

Fight tax avoidance by abolishing the non-domiciled tax status

Abolish the inheritance tax for estates under £2 million

Abolish business rates

Figure S14: Conjoint analysis in Switzerland (Average Marginal Component Effect). (Question 23).

Figure S15: Conjoint analysis in Japan (Average Marginal Component Effect). (Question 23).

Climate policy:

Achieve 50% of electricity from renewable sources by 2030

Invest 150,000 billion yen in the ecological transition

Economic issues:

Raise the minimum wage to ¥1,500 per hour

Provide child allowance of ¥15,000 per month for all children up to age 18

Foreign policy:

International tax on millionaires with 30% financing healthcare and education in low-income countries

Cut development aid

Demand the complete dismantlement of North Korea's nuclear and missile programs

Social issues:

Eliminate electoral district mergers (goku kaiketsu)

Recognize same-sex marriage

Expand eligibility for pension coverage to part-time workers

Promote women's empowerment through reskilling, fair pay, and career continuity

Tax system:

Increase taxes (on income and inheritance) on the richest and reduce them on the poorest

Introduce a consumption tax refund system for low- and middle-income households

Restore fiscal balance and achieve a budget surplus by 2025

Figure S16: Conjoint analysis in the U.S. (Average Marginal Component Effect). (Question 23).

Figure S17: Conjoint analysis in France (in French, cf. Figure S8 for English). (Question 23).

Climat:

- Construire 14 nouveaux réacteurs nucléaires
- Supprimer les Zones à Faibles Émissions (ZFE)

Économie:

- Indexer totalement les retraites sur l'inflation
- Augmenter le SMIC à 1600€ net par mois
- Restaurer l'âge légal de départ à la retraite à 62 ans

Politique étrangère:

- Taxe mondiale sur les millionnaires, dont 30 % financerait la santé et l'éducation dans les pays à bas revenus
- Réduire l'aide au développement
- Doubler le budget militaire d'ici 2030

Société:

- Supprimer le droit du sol
- Peines planchers pour les récidivistes et responsabilité pénale à 16 ans
- Instaurer le Référendum d'Initiative Citoyenne (RIC)

Fiscalité:

- Défiscaliser les primes jusqu'à 10 000 € par an
- Exonérer d'impôt sur le revenu les jeunes de moins de 30 ans
- Baisser l'impôt sur le revenu jusqu'à 4000€/mois net et l'augmenter au-delà
- Rétablir un impôt sur la fortune (ISF) renforcé

Figure S18: Conjoint analysis in Germany (in German, cf. Figure S9 for English). (Question 23).

Figure S19: Conjoint analysis in Italy (in Italian, cf. Figure S10 for English). (Question 23).

Politica climatica:

Annullare il divieto di nuove auto con motore a combustione a partire dal 2035

Raddoppiare la capacità di energia rinnovabile entro il 2030

Politica economica:

Incrementare l'assegno di nascita fino a 3.600 euro per i neonati

Destinare i fondi UE non utilizzati all'esenzione fiscale per le aziende che assumono

Introdurre un salario minimo a norma di legge di 10€ all'ora

Riduzione dell'orario di lavoro senza ridurre gli stipendi

Politica estera:

Tassa internazionale sui milionari, il cui 30% finanzierebbe l'assistenza sanitaria e l'istruzione nei Paesi a basso reddito

Tagliare gli aiuti allo sviluppo

Sviluppare una difesa militare comune europea

Politica sociale:

Imporre un limite legale della migrazione in Italia e trattare le richieste di asilo al di fuori dell'UE

Riconoscere il matrimonio tra persone dello stesso sesso

Introdurre l'istruzione in età della prima infanzia gratuita e obbligatoria (fino ai 3 anni)

Politica fiscale:

Riduzione dell'imposta sul reddito per i nuclei familiari a basso reddito

Sostituire l'imposta sul reddito con una flat tax del 15%.

Figure S20: Conjoint analysis in Poland (in Polish, cf. Figure S11 for English). (Question 23).

Figure S21: Conjoint analysis in Spain (in Spanish, cf. Figure S12 for English). (Question 23).

Figure S22: Conjoint analysis in Japan (in Japanese, cf. Figure S15 for English). (Question 23).

Figure S23: Average preferred revenue split for a global wealth tax (variant *few*). (Question 24).

- Global: Education, Healthcare and Renewable energy in low-income countries
- Domestic: Reduction of the deficit
- Domestic: Reduction in the income tax
- Domestic: Social welfare programs
- Domestic: Education and Healthcare
- ◆ Share allocating at least 5% to Global

Figure S24: Decomposition of preferred shares for each spending item in the revenue split (*All countries together; variant few*). (Question 24).

Figure S25: Decomposition of preferred shares for each spending item in the revenue split (*All countries together; variant many*). (Question 25).

Figure S26: Average preferred revenue split for a global wealth tax (*variant many*). (Question 25).

	All	Europe	France	Germany	Italy	Poland	Spain	United Kingdom	Switzerland	Japan	Saudi Arabia	USA
Global: Education and Healthcare in low-income countries	18.6	19.5	17.2	18.4	19.8	22.3	24.2	18.4	21.0	14.7	21.3	18.8

Global: Forestation and biodiversity projects	16.2	17.2	17.5	18.8	18.1	17.1	14.9	16.3	17.0	14.1	19.3	15.6

Figure S27: “By taking this survey, you will be automatically entered into a lottery to win up to [amount.lottery: \$100].

Should you be selected in the lottery, you will have the option to channel a part of this additional compensation to the charity *Just One Tree* to plant trees.

In case you win the lottery, what share of the [amount.lottery: \$100 prize] would you donate to plant trees?” (Question 27).

Figure S28: Support for the National, Global, and International Climate Schemes, and average belief regarding the support for the GCS. (Questions 26-35).

	All	Europe	France	Germany	Italy	Poland	Spain	United Kingdom	Switzerland	Japan	Saudi Arabia	USA
Supports the National Climate Scheme	66	66	63	63	74	56	69	70	58	68	88	64
Global climate scheme (GCS)	56	63	63	57	76	52	69	59	61	54	85	48
Supports the GCS if its other members* cover 25–33% of world emissions *Low: Global South + EU	66	69	75	63	85	60	71	64	62	67	87	60
Supports the GCS if its other members* cover 56% of world emissions *Mid: Global South + China	68	73	76	72	83	54	78	67	64	67	87	59
Supports the GCS if its other members* cover 64–72% of world emissions *High: Global South + China + EU + various HICs (UK, Japan, South Korea, Canada...)	70	73	76	77	79	71	74	63	74	71	91	64
Supports the GCS if its other members* cover 64–72% of world emissions *High color: High + Distributive effects displayed using colors on world map	63	68	61	68	79	57	77	66	65	63	88	56

Figure S29: Absolute support for plausible global redistribution policies (Percentage of *Somewhat or Strongly support*). (Question 38).

	All	Europe	France	Germany	Italy	Poland	Spain	United Kingdom	Switzerland	Japan	Saudi Arabia	USA
Minimum tax of 2% on billionaires' wealth, in voluntary countries	64	70	75	71	73	63	66	70	64	54	67	61
Bridgetown initiative: MDBs expanding sustainable investments in LICs, and at lower interest rates	56	60	56	61	72	47	57	63	61	45	70	54
L&D: Developed countries financing a fund to help vulnerable countries cope with climate Loss and damage	54	58	55	55	68	55	61	56	52	44	75	52
Raise global minimum tax on profit from 15% to 35%, allocating revenues to countries based on sales	51	58	58	57	70	47	50	58	51	42	53	46
Debt relief for vulnerable countries, suspending payments until they are more able to repay	49	52	48	44	64	53	55	54	52	38	70	48
Expand Security Council to new permanent members (e.g. India, Brazil, African Union), restrict veto use	48	56	54	54	64	50	55	55	54	35	63	44
International levy on shipping carbon emissions, returned to countries based on population	47	54	59	49	62	45	54	53	56	30	60	46
At least 0.7% of developed countries' GDP in foreign aid	47	51	50	48	59	42	58	50	51	33	69	47
NCQG: Developing countries providing \$300 bn a year in climate finance for developing countries	47	53	51	54	62	46	54	52	53	32	67	44
International levy on aviation carbon emissions, raising prices by 30%, returned to countries based on population	38	43	47	42	45	39	42	41	42	26	53	36

Figure S30: Share of plausible global redistribution policies supported (*somewhat or strongly*). (Question 38).

Figure S31: Share of plausible global redistribution policies opposed (*somewhat or strongly*). (Question 38).

Figure S32: Preferred North-to-South climate grant funding in 2035, specified in qualitative terms or in terms of who advocates for that amount (NCQG, variant *Short*). (Question 40).

Figure S33: Preferred North-to-South climate grant funding in 2035, specified in money terms (NCQG, variant *Full*). (Question 39).

Figure S34: Support for an international wealth tax with 30% of revenue funding LICs, depending on the country coverage (*Yes/No* question). (Questions 41-43).

	All	Europe	France	Germany	Italy	Poland	Spain	United Kingdom	Switzerland	Japan	Saudi Arabia	USA
Global: implemented by all other countries	73	78	81	78	85	79	73	71	70	72	84	67
High-income: implemented by all other HICs and not by some MICs (such as China)	69	71	72	73	81	66	68	70	56	66	84	67
International: implemented by some (e.g. EU, UK, Brazil) and not by others (e.g. U.S., China)	67	72	73	70	82	57	77	68	61	61	83	64

Figure S35: Prefers a *sustainable* rather than a *business-as-usual* future. (Question 44).

Figure S36: Relative support for a global progressive income tax on the richest households to finance poverty reduction in the Global South (Percentage of *Somewhat* or *Strongly support* among non-*Indifferent* responses). (Questions 45-46).

	All	Europe	France	Germany	Italy	Poland	Spain	United Kingdom	Switzerland	Japan	Saudi Arabia	USA
Supports tax on world top 1% to finance global poverty reduction (Additional 15% tax on income over [\$120k/year in PPP])	68	73	71	72	84	69	73	67	60	69	82	62
Supports tax on world top 3% to finance global poverty reduction (Additional 15% tax over [\$80k], 30% over [\$120k], 45% over [\$1M])	62	66	70	62	71	70	66	67	42	55	82	57

Figure S37: Absolute support for a global progressive income tax on the richest households to finance poverty reduction in the Global South (Percentage of *Somewhat* or *Strongly support*). (Questions 45-46).

	All	Europe	France	Germany	Italy	Poland	Spain	United Kingdom	Switzerland	Japan	Saudi Arabia	USA
Supports tax on world top 1% to finance global poverty reduction (Additional 15% tax on income over [\$120k/year in PPP])	55	61	62	62	75	50	61	55	53	44	68	51
Supports tax on world top 3% to finance global poverty reduction (Additional 15% tax over [\$80k], 30% over [\$120k], 45% over [\$1M])	49	56	59	53	60	55	57	54	36	35	67	45

Figure S38: “How do you evaluate each of these channels to transfer resources to reduce poverty in LICs?”

Percentage of *Right* or *Best* way (other options: *Wrong* or *Acceptable* way). (Question 48).

	All	Europe	France	Germany	Italy	Poland	Spain	United Kingdom	Switzerland	Japan	Saudi Arabia	USA
Targeted cash transfers (child allowances, disability & elderly pensions)	46	48	43	46	57	45	54	44	47	36	73	45
Development aid agencies	40	42	42	47	39	32	44	43	44	36	57	37
Government, conditional on financing poverty reduction	37	40	39	43	48	33	41	37	35	27	62	35
Local NGOs with democratic processes	31	33	39	33	34	33	33	29	32	22	53	29

None of the above	17	14	20	13	8	10	10	19	15	22	7	20

Figure S45: “Some people argue that Western countries owe reparations for colonization and slavery to former colonies and descendants of slaves.

Reparations could take the form of funding education and facilitating technology transfers, to address unequal opportunities passed down from the past.

Do you support or oppose reparations of this kind for colonization and slavery? ” (Question 53).

Figure S46: Average custom global redistribution. (Question 55).

Figure S47: Global redistribution obtained from median custom parameters: 49% of winners; 18% of losers; degree of redistribution of 5 (out of 10). (Question [55](#)).

Figure S48: “Comprehension question: one respondent with the expected answer will get [amount_lottery: \$100].

How would gasoline prices change as a result of the Global Climate Scheme?
Gasoline prices would...” (Correct answer: *increase*) (Question 60).

Figure S49: Relative agreement for: “To what extent do you agree or disagree with the following statement? “My taxes should go towards solving global problems.”” (Percentage of Agree or Strongly agree among non-Neither agree nor disagree responses). (Question 61).

Figure S50: Absolute agreement for: “To what extent do you agree or disagree with the following statement? “My taxes should go towards solving global problems.”” (Percentage of Agree or Strongly agree). (Question 61).

Figure S51: “Which group of people do you advocate for when you vote?” (Question 62).

Figure S52: “Do you feel that this survey was politically biased?” (Question 63).

Figure S53: “How likely are you to become a millionaire at some point in your life?” (Question 15).

Figure S54: “Were you or your parents born in a foreign country?” (Question 5).

Figure S55: Vote in the last election, compared to actual results among voters. (Questions 16, 18).

Figure S56: Vote in the last election, compared to actual results on the entire population. (Questions 16, 18).

B Questionnaire

The U.S. version of the questionnaire is presented. Features that vary across countries are put in square brackets within the question text, as follows: [feature_name: U.S. value]. Features values for each country are given in [this spreadsheet](#). Random branches or conditions for displaying the question are specified in square brackets before the question text (cf. Figure 2 for the survey flow). The question text is followed by square brackets that refer to Figures and Tables presenting the question results, and the variable name(s) corresponding to the question. Finally, response options are displayed in italics. Unless otherwise specified, response is compulsory and a single response must be chosen.

Welcome

1. Welcome to this survey!

This survey is **anonymous** and is conducted **for research** purposes on a representative sample of [sample_size: 3,000] [nationality: American people].

It takes around 20 min to complete.

The survey contains lotteries and awards for those who get the correct answer to some comprehension questions.

If you are attentive and lucky, **you can win up to [amount_lottery: \$100]**.

Please answer every question carefully.

By clicking on the button below, you consent to the terms and conditions.

Socio-demographics

2. What is your gender? [gender]

Woman; Man; Other

3. What is your country? [hidden_country]

4. What is your age? [age_exact, age]

Below 18; 18 to 20; 21 to 24; 25 to 29; 30 to 34; 35 to 39; 40 to 44; 45 to 49; 50 to 54; 55 to

59; 60 to 64; 65 to 69; 70 to 74; 75 to 79; 80 to 84; 85 to 89; 90 to 99; 100 or above

5. Were you or your parents born in a foreign country? [Figure S54; foreign]

Yes, I was born in a foreign country; Not me but both my parents were born in a foreign country; Not me but one of my parents was born in a foreign country; No, I was born in this country and my parents too

6. Do you live with your partner (if you have one)? [couple]

Yes; No

7. How many people are there in your household?

The household includes: **you**, your spouse, **your family members** who live with you, and your dependents (not flatmates). [hh_size]

1; 2; 3; 4; 5 or more

8. How many children under the age of 14 live with you? [Nb_children__14]

0; 1; 2; 3; 4 or more

9. [new page] [Only in: US] What race or ethnicity do you identify with? (Multiple answers are possible) [race]

White; Black or African American; Hispanic; Asian; American Indian or Alaskan Native; Native Hawaiian or Pacific Islander; Other; Prefer not to say

10. What is the [periodicity_text: monthly] [income_type: gross] income of your household, [income_type: long: after taxes and transfers]?

This includes all sources of income: wages, pensions, welfare payments, property income, dividends, self-employment earnings, Social Security benefits, and income from other sources. [income]

[All but RU, US: Custom thresholds, taking into account household composition Questions 6-8, and corresponding to the country's deciles and quartiles of standard of living, cf. the sheet "Income" in [this spreadsheet](#);

RU, US: Items based on household total income deciles and quartiles, namely in US: *Less than \$17,000; between \$17,001 and \$30,000; between \$30,001 and \$36,000; between \$36,001 and \$43,000; between \$43,001 and \$56,000; between \$56,001 and \$72,000; between \$72,001 and \$91,000; between \$91,001 and \$115,000; between \$115,001 and \$130,000; between \$130,001 and \$150,000; between \$150,001 and \$213,000; More than \$213,000; I prefer not to answer*

11. What is your highest completed education level? [education]
[Country-specific, usually: 0-1 Primary or less; 2 Medium school; 2 Some high school; 3 High school diploma; 3-4 Vocational training; 5 Short-cycle tertiary; 6 Bachelor's; 7-8 Master's or higher]
12. What is your employment status? [employment_status]
Full-time employed; Part-time employed; Self-employed; Unemployed (searching for a job); Student; Retired; Inactive (not searching for a job)
13. [Only the first digits asked in RU, SA] What is your zipcode?
We ask for the zipcode to balance the sample in terms of degree of urbanization (rural, town or city). The survey will be terminated if your zipcode is not recognized.
[zipcode]
14. Are you a homeowner or a tenant? (Multiple answers are possible) [home_owner]
Tenant; Owner; Landlord renting out property; Hosted free of charge
15. [new page] How likely are you to become a millionaire at some point in your life?
[Figure S53; millionaire]
Very unlikely; Unlikely; Likely; Very likely; I am already a millionaire
16. [Except in: RU, SA] Did you vote in the [election: 2024 presidential election]? [Figures S56-S55; voted]
Yes; No; Prefer not to say; I didn't have the right to vote in [country_name: the United States].

Vote

17. [Only in: SA] What is your nationality?
If you have both the Saudi and a foreign nationality, choose "Saudi". [nationality_SA]
Saudi; India; Bangladesh; Syria; Yemen; Egypt; Pakistan; Indonesia; Philippines; Sudan; Myanmar; Jordan; Sri Lanka; Nepal; Turkey; Somalia; Lebanon; Other
18. [Except in: RU, SA] [If voted: Which candidate did you vote for in the [election: 2024 presidential election]?; Otherwise: Even if you did not vote in the [election: 2024 presidential election], please indicate the candidate that you were most likely to have voted for or who represents your views more closely.] [Figures S56-S55; vote]

[Candidates/parties with at least 1% of votes, e.g. in US: *Harris; Trump; Other; Prefer not to say*. In FR, IT, PL, ES, election is the 2024 European election]

Open-ended field

[Four random branches; Figures [S1-S7](#); Random answers can be found on bit.ly/fields2025; field, variant_field]

19. [Branch: concerns] What are your main concerns these days? [Figure [S4](#); concerns_field]
20. [Branch: wish] What are your needs or wishes? [Figure [S5](#); wish_field]
21. [Branch: issue] Can you name an issue that is important to you but is neglected in the public debate? [Figure [S6](#); issue_field]
22. [Branch: injustice] What according to you is the greatest injustice of all? [Figure [S7](#); injustice_field]

Conjoint analysis

23. [Except in: RU, SA] Imagine if the two top candidates in your constituency in the next general election campaigned with the following policies in their party's platforms.

Which of these candidates would you vote for?

Candidate A	Candidate B	
[Random policy]	[Random policy]	[Policy field in random order]
[Random policy]	[Random policy]	[Policy field in random order]
[Random policy]	[Random policy]	[Policy field in random order]
[Random policy]	[Random policy]	[Policy field in random order]
[Random policy]	[Random policy]	[Policy field in random order]

[Figures [S60](#), [S8-S21](#); conjoint]

Candidate A; Candidate B; Neither of them

Revenue split of global tax

[Two random branches; field, variant_split]

24. [Branch: Few] Imagine a wealth tax applied to households with a net worth above [tax_threshold: \$5 million], implemented in every country around the world.

[tax_country_name: In the U.S.], the tax revenues collected would be [tax_revenue: \$514 billion] per year (that is, [tax_revenue_gdp: 2]% of [tax_country_gdp: U.S. GDP]), while it would be [LIC_revenue: \$1 billion] in all low-income countries combined (700 million people live in a low-income country, most of them in Africa). Each country would retain part of the revenues it collects and use it for different domestic purposes. The remaining part would be pooled globally to finance sustainable development in low-income countries.

What percentage of the global wealth tax revenue should be allocated to each category?

The total allocation must sum to 100%.

[Figures 4, S23-S24; revenue_split_few]

Domestic: Education and Healthcare; Domestic: Social welfare programs; Domestic: Reduction in the federal income tax; Domestic: Reduction of the deficit; Global: Education, Healthcare and Renewable energy in low-income countries

25. [Branch: Many] Imagine a wealth tax applied to households with net worth above [tax_threshold: \$5 million], implemented in all countries around the world.

[tax_country_name: In the U.S.], the tax revenues collected would be [tax_revenue: \$514 billion] per year (that is, [tax_revenue_gdp: 2]% of [tax_country_gdp: U.S. GDP]), while it would be [LIC_revenue: \$1 billion] in all low-income countries combined (700 million people live in a low-income country, most of them in Africa). Each country would retain part of the revenues it collects and use it for different domestic purposes. The remaining part would be pooled globally to finance sustainable development.

What percentage of the global wealth tax revenue should be allocated to each

category?

The total allocation must sum to 100%.

[Figures 4, S25-S26; revenue_split_many]

[Five items are chosen at random among the 13 possible ones: *Domestic: Education and Research; Domestic: Healthcare; Domestic: Defense; Domestic: Deficit reduction; Domestic: Justice and Police; Domestic: Retirement pensions; Domestic: Social welfare programs; Domestic: Infrastructure (public transport, water systems...); Domestic: Income tax reduction; Global: Education and Healthcare in low-income countries; Global: Renewable energy and infrastructure to cope with climate change; Global: Loss and Damage Fund (to rebuild after climate disasters); Global: Forestation and biodiversity projects*]

Warm glow – moral substitute

[Three random branches: NCS; Donation; control group; variant_warm_glow]

26. [Branch: NCS] Do you agree with the following policy?

Climate Scheme:

To meet the national climate target, a limited number of permits to emit greenhouse gases would be issued nationally. Polluting firms would be required to buy permits to cover their greenhouse gas emissions. Such a policy would make fossil fuel companies pay for their emissions and gradually raise the price of fossil fuels. Higher prices would encourage people and companies to use less fossil fuels, reducing greenhouse gas emissions.

The revenues generated by the sale of permits would finance an equal cash transfer. Each [country_adjective: American] would receive [amount_expenses: \$115][periodicity: per month], thereby offsetting price increases for the average [country_adjective: American].

Do you support the Climate Scheme? [Figures 5, S28; ncs_support]

Yes; No

27. [Branch: Donation] By taking this survey, you will be automatically entered into a lottery to win up to [amount_lottery: \$100].

Should you be selected in the lottery, you will have the option to channel a part of this additional compensation to the charity *Just One Tree* to plant trees.

In case you win the lottery, what share of the [amount_lottery: \$100 prize] would you donate to plant trees? [Figures 8a, S27 ; donation]

Share to plant trees

Cap & Share

28. Do you support the following policy?

To ensure that you have attentively read the description, we will ask some comprehension questions later in the survey: those who get correct answers can win [amount_lottery: \$100].

Global Climate Scheme:

In 2015, all countries agreed to contain global warming “well below +2 °C”. To achieve this, there is a maximum amount of greenhouse gases we can emit globally.

To meet the climate target, a limited number of permits to emit greenhouse gases would be issued globally. Polluting firms would be required to buy permits to cover their greenhouse gas emissions. Such a policy would make fossil fuel companies pay for their emissions and gradually raise the price of fossil fuels. Higher prices would encourage people and companies to use less fossil fuels, reducing greenhouse gas emissions.

In accordance with the principle that each human has an equal right to pollute, the revenues generated by the sale of permits could finance a global basic income. Every adult would receive [amount_bi: \$20][periodicity: per month], thereby lifting 600 million people who earn less than \$2 a day out of extreme poverty.

The typical [national: American] would lose out financially [amount_lost: \$105][periodicity: per month] (as he or she would face around [price_increase: 2]% in price increases, which is higher than the [amount_bi: \$20][periodicity: per month] they would receive).

The policy could be implemented as soon as 100 countries agree to it. Countries that would refuse to take part in the policy could face sanctions (like tariffs) from the rest of the world and would be excluded from the basic income program.

Do you support the Global Climate Scheme? [Figures 5, 8a, S28; gcs_support]

Yes; No

[new page] [Two random branches: own; US; Figure S28; gcs_belief, variant_belief]

29. [Branch: US] According to you, **what percentage of [belief_nationality: All but US: Americans; US: Europeans] would answer Yes to the previous question** (considering that typical [belief_nationality] would lose [belief_loss: \$140] per month from the Global Climate Scheme)?

The respondent who is closest to the correct value will get [amount_lottery: \$100].

Percentage of [belief_nationality] in favor of Global Climate Scheme

30. [Branch: own] According to you, **what percentage of [nationality: fellow citizens] would answer Yes to the previous question?**

The respondent who is closest to the correct value will get [amount_lottery: \$100].

Percentage of [nationality: fellow citizens] in favor of Global Climate Scheme

Cap & Share non-universal

[Four random branches: low; mid; high; high_color; Figures 5, S28; ics_support]

31. [Branch: low] Below is a map showing a possible set of countries that would participate in the Global Climate Scheme previously described.

These countries include India, the European Union, as well as all Africa, Latin America, South-Asia and South-East Asia.

Collectively, these [nb_countries_low: 145] countries account for [emissions_low_without: 40]% of global emissions (if [ics_country: the U.S.] joined them, [emissions_low_with: 40]% of global emissions would be covered).

32. [Branch: mid] Below is a map showing a possible set of countries that would participate in the Global Climate Scheme previously described.

These countries include China, India, as well as all Africa, Latin America, South-Asia and South-East Asia.

Collectively, these 119 countries account for 56% of global emissions (if [ics_country: the U.S.] joined them, [emissions_mid_with: 70]% of global emissions would be covered).

33. [Branch: high] Below is a map showing a possible set of countries that would participate in the Global Climate Scheme previously described.

These countries include China, India, [text_countries_high: the European Union, Japan, the United Kingdom], Canada, South Korea, as well as all Africa, Latin America, South-Asia and South-East Asia.

Collectively, these [nb_countries_high: 153] countries account for [emissions_high_without: 71]% of global emissions (if [ics_country: the U.S.] joined them, [emissions_high_with: 86]% of global emissions would be covered).

34. [Branch: high_color] Below is a map showing a possible set of countries that would participate in the Global Climate Scheme previously described.

These countries include China, India, [text_countries_high: the European Union, Japan, the United Kingdom], Canada, South Korea, as well as all Africa, Latin America, South-Asia and South-East Asia.

Collectively, these [nb_countries_high: 153] countries account for [emissions_high_without: 72]% of global emissions (if [ics_country: the U.S.] joined them, [emissions_high_with: 86]% of global emissions would be covered).

Note that a provision would prevent the Global Climate Scheme from harming low- and middle-income countries: this is why countries like China, Mexico, or Egypt are in white on the map (they would neither win nor lose financially).

35. Do you support [ics_country: the U.S.] joining the Global Climate Scheme, in case it

is adopted by the above countries? [Figures 5, S28; ics_support]

Yes; No

Warm glow – realism

36. [Two random branches: with or without this informational text.] To ensure that you have attentively read the description below, we will ask some comprehension questions later in the survey: those who get correct answers can win \$100.

In several international organizations, **countries have agreed to demonstrate some degree of solidarity in addressing global challenges.**

Negotiations are ongoing to implement specific mechanisms for sustainable development.

Here are a few examples:

🚢 In 2025, to reduce carbon emissions from shipping, **the International Maritime Organization adopted an international levy on excess emissions from maritime fuel, that should partly finance low-income countries.**

💰 Since 1970, **developed countries have agreed to contribute 0.7% of their GDP in foreign aid** and development assistance.

🌱 In international climate negotiations, **developed countries have committed to finance climate action in developing countries.** In 2009, they committed to provide \$100 billion per year by 2020. In 2023, all countries agreed to set up a fund to help vulnerable countries cope with loss and damage from climate change. In 2024, the \$100 billion goal was increased to \$300 billion per year by 2035.

📈 In 2021, 136 countries adopted a minimum tax rate of 15% on multinational profits.

💎 In 2024, under the leadership of Brazil, **the G20 considered the introduction of a global tax of 2% on the wealth of billionaires.**

🌐 In 2024, the UN General Assembly adopted the Pact for the Future, which foresees a reform of the UN Security Council to limit the power of its five permanent member and expand it to new members.

🗳️ Led by the Prime Minister of Barbados and supported by the UN Secretary Gen-

eral, the Bridgetown initiative seeks a new financial system that would drive financial resources towards climate action and sustainable development. [Figure 8b; info_solidarity]

37. According to you, how likely is it that international policies involving significant transfers from high-income countries to low-income countries will be introduced in the next 15 years? [Figure 8b; likely_solidarity]

Very unlikely; Unlikely; Likely; Very likely

38. Do you support or oppose the following policies?

[Only in PL, SA: (As some items refer to “developed countries”, note that we consider [Saudi Arabia] to be a developed country in this question.)] [Figures 9, S29-S31; solidarity_support]

[Item order is randomized]

- Institutions like the World Bank investing in many more sustainable projects in lower-income countries, and offering lower interest rates (the Bridgetown initiative)
- Developed countries financing a fund to help vulnerable countries cope with loss and damage from climate change
- Expanding the UN Security Council (in charge of peacekeeping) to new permanent members such as India, Brazil, and the African Union, and restricting the use of the veto
- Raising the globally agreed minimum tax rate on profits of multinational firms from 15% to 35%, closing loopholes and allocating revenues to countries where sales are made
- Debt relief for vulnerable countries by suspending repayments until they are better able to repay, promoting their development
- An international levy on carbon emissions from shipping, funding national budgets in proportion to population
- An international levy on carbon emissions from aviation, raising ticket prices by 30% and funding national budgets in proportion to population
- Developed countries providing \$300 billion a year (0.4% of their GDP) to finance climate action in developing countries

- Developed countries contributing at least 0.7% of their GDP in foreign aid and development assistance
- A minimum tax of 2% on the wealth of billionaires, in voluntary countries

Strongly oppose; Somewhat oppose; Indifferent; Somewhat support; Strongly support

NCQG

[Two random branches: Full; Short; ncqg_fusion, variant_ncqg]

39. [Branch: Full] **At international climate negotiations, developing countries call for larger provision of "climate finance": the financing of climate action from developed countries in developing countries.** [developed_note: (Note that we consider Saudi Arabia to be a developed country in this question.)]

There are two kinds of climate finance: grants (that is, donations) and loans. In 2022, \$26 billion was provided as grants and the rest as loans, for a total of \$116 billion.

In 2009, developed countries agreed to mobilize \$100 billion per year in climate finance by 2020. In 2024, they committed to raise this goal to \$300 billion by 2035. None of the goals specify which share should be provided as grants.

Below are different positions on the amount of climate finance that should be provided in 2035, all expressed in grant-equivalent terms (that is, not counting loans):

- \$0: There should be no contributions from developed countries to climate action in developing countries.
- \$26 billion (0.04% of developed countries' GDP): The current amount, consistent with the old (2020) goal.
- \$100 billion (0.14% of GDP): The old (2020) goal, if all climate finance were provided as grants.
- \$300 billion (0.43% of GDP): The new (2035) goal, if all climate finance were provided as grants.
- \$600 billion (0.86% of GDP): The goal called for by India, a position shared by most developing countries.
- \$1,000 billion (1.43% of GDP): The goal called for by Climate Action Network (a

network of NGOs including Greenpeace, Oxfam, and WWF).

- \$5,000 billion (7.14% of GDP): The goal called for by Demand Climate Justice (a network of NGOs including 350.org and the World Council of Churches)

If you could choose the amount of climate finance provided by developed countries to developing countries in 2035, what amount would you choose (in grant-equivalent terms)?

[Figure S33; ncqg_full]

[Item order is randomly reversed or not]

\$0; \$300 billion; \$600 billion; \$26 billion; \$100 billion; \$1,000 billion; \$5,000 billion

40. [Branch: Short] **"Climate finance" designates the financing of climate action from developed countries in developing countries.** [developed_note: (Note that we consider Saudi Arabia to be a developed country in this question.)]

There are two kinds of climate finance: grants (that is, donations) and loans. The large majority is currently provided as loans.

In 2009, developed countries agreed to mobilize \$100 billion per year in climate finance. In 2024, they committed to triple this goal by 2035. None of the goals specify which share should be provided as grants.

At international climate negotiations, developing countries call for larger provision of climate finance, particularly in the form of grants.

If you could choose the level of climate finance provided by developed countries to developing countries in 2035, what would you choose?

[Figure S32; ncqg]

[Item order is randomly flipped or not]

Stop all provision of climate finance.;

Reduce the provision of climate finance.;

Maintain current contributions (\$26 billion per year in grants, that is 0.04% of developed countries' GDP, and \$80 billion in loans, or 0.1% of GDP).;

Meet the newly agreed goal by tripling grants and loans (\$100 billion in grants, or 0.15% of GDP).;

Increase climate finance to a level between what developed countries have agreed and what

developing countries are asking for (\$300 billion in grants, or 0.45% of GDP).;
Increase climate finance to match what developing countries are asking for (\$600 billion in grants, or 0.9% of GDP).;
Increase climate finance to match what NGOs are asking for (at least \$1,000 billion per year in grants, that is 1.4% of GDP, is what Greenpeace, Oxfam, WWF, and the World Council of Churches ask for).

Wealth tax depending on sets of countries

[Three random branches: Global; HIC; Int'l; Figures 6, S34; wealth_tax_support, variant_wealth_tax]

41. [Branch: Global] **Imagine an international tax on individuals with net worth above [wealth_threshold: \$1 million].**

Only wealth above [wealth_threshold: \$1 million] would be taxed, at a rate of 2%. Each country would retain 70% of the revenues it collects, while 30% would be pooled at the global level to finance public services in low-income countries (in particular, access to drinking water, healthcare, and education in Africa).

Say we are in 2030. **Imagine that all other countries in the world adopt this policy. Do you support [country_name: the United States] adopting this international tax on millionaires?**

Yes; No

42. [Branch: HIC] **Imagine an international tax on individuals with net worth above [wealth_threshold: \$1 million].**

Only wealth above [wealth_threshold: \$1 million] would be taxed, at a rate of 2%. Each country would retain 70% of the revenues it collects, while 30% would be pooled at the global level to finance public services in low-income countries (in particular, access to drinking water, healthcare, and education in Africa).

Say we are in 2030. [hic_tax: **Imagine that all other high-income countries (such as the European Union, Japan, and Canada) adopt this policy and some middle-income countries (such as China) do not.**]

Do you support [country_name: the United States] adopting this international tax on millionaires?

Yes; No

43. [Branch: Int'l] **Imagine an international tax on individuals with net worth above [wealth_threshold: \$1 million].**

Only wealth above [wealth_threshold: \$1 million] would be taxed, at a rate of 2%. Each country would retain 70% of the revenues it collects, while 30% would be pooled at the global level to finance public services in low-income countries (in particular, access to drinking water, healthcare, and education in Africa).

Say we are in 2030. [intl_tax: **Imagine that some countries (such as the European Union) adopt this policy and others (such as Japan, Canada, and China) do not.**] **Do you support [country_name: the United States] adopting this international tax on millionaires?**

Yes; No

Scenarios & radical tax

[Scenario A & B are randomly interverted.]

44. **Consider two possible scenarios for the world for the next 20 years.**

Scenario A:

Most countries implement coordinated policies to limit global warming to +2°C and reduce inequality. The world greatly reduces greenhouse gas emissions and is on track to meet its climate target. Taxes on millionaires fund the installation of heat pumps, the thermal insulation of buildings, and improved public transportation. Yachts and private jets are phased out worldwide. Cars are all electric by 2045, and they are about the same price as internal combustion cars nowadays. By 2045, environmental regulations gradually double the price heating fuel or gas, air travel, and beef. As a result, people fly half as much, eat half as much meat, and use more public transportation in 2045 than they did in 2025. Despite higher prices for polluting goods, the overall purchasing power is preserved, thanks to a decrease in sales tax that reduces the prices of non-polluting goods.

Scenario B:

Since 2025, no additional policies are implemented to address climate change or inequality. People maintain the same lifestyles as in 2025. For example, most people

continue to drive cars with internal combustion engines. Greenhouse gas emissions are stable. Global warming is expected to reach +3°C by 2100 and higher levels beyond that date. A warmer climate will cause more frequent and more severe droughts, heatwaves, wildfires, and floodings.

Apart from the elements described, the two scenarios are the same (for example, in terms of unemployment or crime).

Which scenario do you prefer for the future? [Figures 10, S35; sustainable_future]
Scenario A; Scenario B

[new page] [Two random branches: top1; top3; Figures 10, S36-S37; top_tax_support, variant_top_tax]

45. [Branch: top1] Currently, 2 billion people live in acute poverty, with less than [lcu_250: \$250][periodicity: per month].

The Sustainable Development Goals, adopted by all countries in 2015, aim to alleviate poverty and give access to healthcare, education, drinking water, and sanitation for all by 2030. Due to lack of funding, the world is not on track to meet these poverty reduction goals.

Poverty reduction could be funded by a global tax on individual income above [lcu_120k: \$120,000][periodicity_tax: per year].

The tax rate would be 15% for every [currency: dollar] over [lcu_120k: \$120,000] of income after existing taxes.

For example, a single person earning [lcu_130k: \$130,000][periodicity_tax: per year] after taxes would pay [lcu_1500: \$1,500] in additional taxes, or 15% of [lcu_10k: \$10,000] = [lcu_130k: \$130,000] – [lcu_120k: \$120,000]. Meanwhile, a married couple earning [lcu_200k: \$200,000][periodicity_tax: per year], [lcu_100k: \$100,000] for each of them, would go untaxed.

This tax would apply to the richest 1% of the world's population. [tax_country_name: In the United States], it would affect the richest [affected_top1: 8]% and redistribute [transfer_top1: 3]% of GDP to lower-income countries.

Do you support or oppose such a global tax on the richest people to finance global

poverty reduction?

Strongly oppose; Somewhat support; Strongly support; Somewhat oppose; Indifferent

46. [Branch: top3] Currently, 3 billion people live in deep poverty, with less than [lcu_400: \$400][periodicity: per month].

The Sustainable Development Goals, adopted by all countries in 2015, aim to alleviate poverty and achieve access to healthcare, education, drinking water, and sanitation for all by 2030. Due to lack of funding, the world is not on track to meet these poverty reduction goals.

Poverty reduction could be funded by a global tax on individual income above [lcu_80k: \$80,000][periodicity_tax: per year].

The tax rate would be 15% for every [currency: dollar] over [lcu_80k: \$80,000] of income after existing taxes, **30% over [lcu_120k: \$120,000], and 45% over [lcu_1M: \$1 million].**

For example, a single person earning [lcu_90k: \$90,000][periodicity_tax: per year] after taxes would pay [lcu_1500_top3: \$1,500] in additional taxes, or 15% of [lcu_10k_top3: \$10,000] = [lcu_90k: \$90,000] – [lcu_80k: \$80,000]. Meanwhile, a married couple earning [lcu_150k: \$150,000][periodicity_tax: per year], [lcu_75k: \$75,000] for each of them, would go untaxed.

This tax would apply to the richest 3% of the world's population. [tax_country_name: In the United States], it would affect the richest [affected_top3: 18]% and redistribute [transfer_top3: 8]% of GDP to lower-income countries.

Do you support or oppose such a global tax on the richest people to finance global poverty reduction?

[Figures 10, S36-S37; top3_tax_support]

Strongly oppose; Somewhat support; Strongly support; Somewhat oppose; Indifferent

47. To show that you are attentive, please select "A little" in the following list: [attention_test]
Not at all; A little; A lot; A great deal

Preferred transfer means to LICs

48. Below are different ways to transfer resources to help reduce poverty in a low-income country.

How do you evaluate each of these options?

[Figures 12, S38-S40; transfer_how] [Item order is randomly flipped or not]

- Transfers to public development aid agencies which then finance suitable projects
- Transfers to the national government conditioned on the use of funds for poverty reduction programs
- Unconditional transfers to the national government
- Unconditional transfers to local authorities (municipality, village chief...)
- Transfers to local NGOs with democratic decision-making processes
- Cash transfers to parents (child allowances), to the disabled and to the elderly
- Unconditional cash transfers to each household

A wrong way; An acceptable way; A right way; The best way

Radical redistribution

49. Should governments actively cooperate to have all countries converge in terms of GDP per capita by the end of the century? [Figures 10, S41; convergence_support]

Yes; No; I prefer not to answer

50. If there was a worldwide movement in favor of a global program to tackle climate change, implement taxes on millionaires and fund poverty reduction in low-income countries, to what extent would you be willing to be part of that movement? (Multiple answers possible) [Figures 10, S42; global_movement]

I would not support such a movement.; I could sign a petition and spread ideas.; I could attend a demonstration.; I could go on strike.; I could donate [amount_lottery: \$100] to a strike fund.

51. [Except in: RU, SA] Let us call "your political party" the party you voted for in the last election, or the party that represents your views most closely.

Imagine there was a **worldwide coalition** of political parties in favor of a common program **to tackle climate change, implement taxes on millionaires and fund**

poverty reduction in low-income countries.

Would you be more likely to vote for your party if it were part of that coalition?

[Figures 10, S43; vote_intl_coalition] [Item order is randomly flipped or not]

*Yes, I would be **more likely** to vote for my party if it joined that coalition (or to vote for another party if only that other party joined the coalition).;*

*My choice would **not depend** on which parties are part of that coalition.;*

*No, I would be **less likely** to vote for my party if it joined that coalition.*

52. Some people think that high-income countries should support low-income countries.

Among the different reasons given, which ones do you agree with? (Multiple answers possible) [Figure S44; why_hic_help_lic] [Order of the first three items is randomized]

High-income countries have a historical responsibility for the current situation in low-income countries.;

In the long run, it is in the interest of high-income countries to help low-income countries.;

Helping those in need is the right thing to do. This is also true at the international level.;

None of the above.

53. [Only in: FR, DE, IT, ES, GB, US] Some people argue that Western countries owe reparations for colonization and slavery to former colonies and descendants of slaves. Reparations could take the form of funding education and facilitating technology transfers, to address unequal opportunities passed down from the past.

Do you support or oppose reparations of this kind for colonization and slavery?

[Figures 10, S45; reparations_support]

Strongly oppose; Somewhat oppose; Indifferent; Somewhat support; Strongly support

[Except in: RU] Custom redistribution

54. What is the [periodicity_text: yearly] income of your household **after taxes and social benefits?**

This includes all sources of income: salaries, pensions, allowances, welfare benefits, property income, etc.

My household earns ... [text_unit: \$ per year] (answer with no comma, no space, no

period):

[income_exact]

55. [new page] If you could redistribute income at the global level, what would you do? In this question, we let you choose your preferred parameters for a redistribution of income at the world level.

If you prefer to skip this question, check the corresponding box at the bottom of the page.

The worldwide redistribution of income would take the form of additional policies, taxes, and transfers, on top of existing ones.

These policies would lower the income of the richest (the losers from the redistribution) and increase the income of the poorest (the winners).

Below you will find a graph of the world distribution of after-tax income and three sliders that vary it. The current distribution is in red, and your custom one is in green.

The first two sliders control the proportion of winners and the proportion of losers, among all humans. The third slider controls the degree of redistribution from the richest to the poorest.

If you do not want new policies to reduce global inequality, you can set the third slider to zero.

You need to move the sliders (by holding the mouse down on the little squares and moving to the side) to make the green curve evolve: the idea is to move the sliders **until you get a green curve you are satisfied with.**

Examples of income changes after your proposed redistribution:

Now	After
0 [text_unit: \$ per year]	[after_0] [text_unit: \$ per year]
[now_10k] [text_unit]	[after_10k] [text_unit]
[now_60k] [text_unit]	[after_60k] [text_unit]
[now_100k] [text_unit]	[after_100k] [text_unit]
Your <i>individual</i> income	
[own] [text_unit]	[after_own] [text_unit]

[Figures 13, S46-S47] I am satisfied with my custom redistribution.;
I want to skip this question.

Well-being (for another project)

[Four random branches: *gallup_0*; *gallup_1*; *wvs_0*; *wvs_1*; *well_being*, *variant_well_being*]

56. [Branch: *gallup_0*] Please imagine a ladder, with steps numbered from 0 at the bottom to 10 at the top. The top of the ladder represents the best possible life for you and the bottom of the ladder represents the worst possible life for you.

On which step of the ladder would you say you personally feel you stand at this time? [*well_being_gallup_0*]

Worst possible 0; 1; 2; 3; 4; 5; 6; 7; 8; 9; Best possible 10

57. [Branch: *gallup_1*] Please imagine a ladder, with steps numbered from 1 at the bottom to 10 at the top. The top of the ladder represents the best possible life for you and the bottom of the ladder represents the worst possible life for you.

On which step of the ladder would you say you personally feel you stand at this time? [*well_being_gallup_1*]

Worst possible 1; 2; 3; 4; 5; 6; 7; 8; 9; Best possible 10

58. [Branch: *wvs_0*] All things considered, how satisfied are you with your life as a whole these days? [*well_being_wvs_0*]
Completely dissatisfied 0; 1; 2; 3; 4; 5; 6; 7; 8; 9; Completely satisfied 10
59. [Branch: *wvs_1*] All things considered, how satisfied are you with your life as a whole these days? [*well_being_wvs_1*]

Completely dissatisfied 1; 2; 3; 4; 5; 6; 7; 8; 9; Completely satisfied 10

Comprehension

60. *Comprehension question: one respondent with the expected answer will get [amount_lottery: \$100].*

How would gasoline prices change as a result of the Global Climate Scheme?

Gasoline prices would... [Figure S48; gcs_comprehension] [Item order is randomly flipped or not]

increase; not be affected; decrease

Synthetic questions

61. To what extent do you agree or disagree with the following statement? "My taxes should go towards solving global problems." [Figures 10, S49-S50; my_tax_global_nation]
Strongly agree; Agree; Neither agree nor disagree; Disagree; Strongly disagree

62. Which group of people do you advocate for when you vote? [Figures 11, S51; group_defended]
Sentient beings (humans and animals); Humans; [country_adjective_plural: Americans]; People from my community (for example my region, my religion, my gender...); My family and myself

Feedback

63. Do you feel that this survey was politically biased? [Figure S52; survey_biased]
Yes, left-wing biased; Yes, right-wing biased; No, I do not feel it was biased
64. The survey is nearing completion. You can now enter any comments, thoughts, or suggestions in the field below. [Random answers can be found on bit.ly/fields2025; comment_field]

C Representativeness of the surveys

Table S1: Sample representativeness in France, Germany, Italy.

	France			Germany			Italy

E The determination of a custom redistribution

In Question 55, respondents are asked for their preferred redistribution of the world's post-tax income. This custom redistribution is determined by modifying the current distribution using the respondent's three input parameters:

- The *proportion of winners*, i.e. the share of people (at the bottom of the distribution) advantaged by the custom redistribution;
- The *proportion of losers*, i.e. the share of people (at the top) disadvantaged by the redistribution;
- The *degree of redistribution*, ranging from 0/10 (no redistribution) to 10/10 (maximal redistribution).

The determination of the custom distribution given these parameters relies on the algorithm *Dis/adv* introduced by Fabre (2022). In that paper, Fabre (2022) surveyed two representative samples of French respondents. The first survey uncovered the median preferred parameters for a national income redistribution.¹ The second survey showed that 52% supported the income redistribution defined using these parameters while only 26% opposed it. Furthermore, a majority among the French respondents who expressed an opinion agreed that it is a good idea to “determine the citizens’ preferred tax schedule from a survey and then submit the proposal that would emerge from the survey to a referendum.” Therefore, the algorithm *Dis/adv* applied to median preferred parameters has been validated both through the support for the resulting redistribution and through the support for such democratic method of preference aggregation to determine an income redistribution. Nonetheless, the algorithm *Dis/adv* is just a first attempt to adjust the tax schedule by aggregating citizens’ preferences, and more appropriate methods may be proposed. Although Fabre (2022) finds that the algorithm *Dis/adv* fares better than another algorithm tested, the method still suffers from some limitations. In particular, the current method is difficult to understand for the users, and it only allows for redistribution from the rich to the poor (it would thus be inappropriate if the level of inequality were considered too low). Below, I describe the algorithm *Dis/adv*, available for use at

¹The median preferred proportions of winners and losers were 50% and 10%, respectively. The median preferred degree of redistribution was defined indirectly, using the median preferred demogrant: €800/month. The resulting redistribution entailed 12% of GDP redistributed from the top 10% to the bottom 50%.

bit.ly/custom_redistr, and implemented in the R function `compute_custom_redistr` on github.com/bixiou/robustness_global_redistr/raw/main/code_robustness/2_prepare.R.

Algorithm Dis/Adv It is worth reminding that on a range of income (concerning people that are neither winner nor loser from the reform), both current and custom distributions coincide. The algorithm proceeds as follows:

1. Define the *extreme distribution* as the current distribution bounded by the income thresholds of winners and losers. In other words, draw two horizontal lines at each end of the distribution, by setting the incomes of winners to the income of the richest winner, and those of losers to income of the poorest loser.
2. Compute what can be redistributed on either side as the area between the extreme and current distributions: what can be given to winners on the left side (L) or taken on the right side (R). If and only if what can be given is lower than what can be taken ($L < R$, as in Figure S58), the left side is binding, and it determines the *amount transferred* from the rich to the poor: $\min\{L; R\} \cdot \text{degree}$.
3. On the binding side, define the custom distribution as a linear mixture between the current and extreme distributions, with the mixture parameter set by the *degree of redistribution*. In other words, starting from the current distribution, narrow the gap with the extreme distribution by a factor *degree*.

Figure S58: Algorithm for the custom redistribution, with parameters *winners*: 60%, *losers*: 20%, *degree*: 4/10.

4. Adjust the non-binding side by narrowing the gap with the extreme distribution, using the unique mixture parameter that preserves aggregate income (so that the amount transferred is the same on both sides).²
5. [Optional step, used in the survey.] To increase the demogrant (i.e. the lowest income) and make the reform more progressive on the left side, try to replace the left side by a straight line. In other words, find the demogrant and the straight line between the demogrant and the threshold of winners that respects the amount transferred. If this straight line crosses the current distribution or if it implies a regressive redistribution (in that some income would increase less than a higher income), abandon the straight line and keep the custom redistribution as is.

Once the custom redistribution has been determined, it is straightforward to compute the additional tax schedule required to attain it.³ Figure S59 presents the tax schedule required to attain the average custom redistribution (weighted over all respondents). Figure S59 shows that (on the losers' side) this redistribution can be approximated by additional marginal tax rates of 7% above \$25,000/per year, and 16% above \$40,000. Figure S59 also compares this tax schedule with those associated with the radical income redistribution tested in Questions 45-46: While the average custom redistribution features a much larger tax base than the radical tax targeting the top 3% (as it taxes the top 28%), its top tax rate is three times lower, so that the two redistributions entail similar transfers from the rich to the poor, at 5.1% of the world's income.

²While we do not account for behavioral responses, one can adjust the algorithm to account for them. It suffices define a post-reform aggregate income, which can be lower than the pre-reform one if the reform disincentivizes economic activity.

³For a sophisticated calculation of the required tax schedule, which allows for behavioral responses and a gradual implementation, see Appendix IX of Fabre (2022).

J Main results on selected demographics, including by vote

Figure S61: [On selected demographics] Support for global redistribution action/policies.

	All	Millionaires	Europe Non-voters	Europe Left	Europe Center/Right	Europe Far right	Japan Non-voters	Japan Left	Japan Center/Right	Saudi Arabia	Saudi citizens	U.S. Non-voters	U.S. Harris	U.S. Trump
Supports the National Climate Scheme	66	57	64	80	64	47	69	69	70	88	91	64	78	50
Global climate scheme (GCS)	56	44	61	77	60	46	48	61	57	85	85	54	58	35
Supports int'l climate scheme (any variant)	67	57	67	85	71	55	61	75	69	88	91	63	75	43
Supports int'l tax on millionaires with 30% funding LICs (any variant)	70	41	72	89	68	59	60	74	68	83	83	69	79	50
Supports tax on world top 1% to finance global poverty reduction (Additional 15% tax on income over [\$120k/year in PPP])	55	37	58	81	50	48	36	51	45	68	74	50	64	37
Supports tax on world top 3% to finance global poverty reduction (Additional 15% tax over [\$80k], 30% over [\$120k], 45% over [\$1M])	49	30	51	72	50	44	34	45	31	67	74	46	57	34
Prefers sustainable future	68	60	68	83	70	54	74	81	76	71	70	67	78	43
"Governments should actively cooperate to have all countries converge in terms of GDP per capita by the end of the century"	58	44	62	79	65	56	53	62	58	76	82	53	58	39
Could sign a petition and spread ideas	52	37	54	66	50	44	39	64	54	40	41	49	65	32
More likely to vote for party if part of worldwide coalition for climate action and global redistribution	36	30	35	61	33	27	16	31	22	NA	NA	28	52	27
Supports reparations for colonization and slavery in the form of funding education and technology transfers	35	26	39	54	30	24	NA	NA	NA	NA	NA	31	45	17
"My taxes should go towards solving global problems"	41	40	38	61	40	30	28	38	33	66	70	36	54	27

Figure S62: [On selected demographics] Relative support for plausible global redistribution policies (Percentage of *Somewhat* or *Strongly* support among non-Indifferent responses).

	All	Millionaires	Europe Non-voters	Europe Left	Europe Center/Right	Europe Far right	Japan Non-voters	Japan Left	Japan Center/Right	Saudi Arabia	Saudi citizens	U.S. Non-voters	U.S. Harris	U.S. Trump
Minimum tax of 2% on billionaires' wealth, in voluntary countries	81	64	84	94	81	74	82	87	77	86	85	81	93	56
Bridgetown initiative: MDBs expanding sustainable investments in LICs, and at lower interest rates	79	72	77	93	86	63	77	86	80	87	87	78	92	52
L&D: Developed countries financing a fund to help vulnerable countries cope with climate Loss and damage	73	63	72	87	78	53	72	77	72	89	90	75	88	45
Expand Security Council to new permanent members (e.g. India, Brazil, African Union), restrict veto use	72	62	73	87	79	59	64	72	68	84	85	70	86	45
Raise global minimum tax on profit from 15% to 35%, allocating revenues to countries based on sales	71	62	70	89	69	65	70	77	71	77	76	66	84	45
International levy on shipping carbon emissions, returned to countries based on population	70	58	70	87	72	56	57	64	59	81	84	68	86	47
Debt relief for vulnerable countries, suspending payments until they are more able to repay	69	55	71	83	67	52	69	74	66	88	90	74	81	47
At least 0.7% of developed countries' GDP in foreign aid	68	61	69	83	71	45	56	66	66	86	87	68	84	46
NCQG: Developing countries providing \$300 bn a year in climate finance for developing countries	65	54	67	85	71	44	51	66	60	86	87	67	83	34
International levy on aviation carbon emissions, raising prices by 30%, returned to countries based on population	53	46	48	71	53	40	43	49	47	70	73	48	67	34

K Main results weighted by vote

Figure S63: [Weighted by vote] Support for the National, Global, and International Climate Schemes (Yes/No question). (Questions 26-35).

Figure S64: [Weighted by vote] Support for an international wealth tax with 30% of revenue funding LICs, depending on the country coverage (Yes/No question). (Questions 41-43).

Figure S65: [Weighted by vote] Effect on the likelihood that a political program is preferred of containing the following policy (compared to no foreign policy in the program). (Question 23)

Figure S66: [Weighted by vote] Testing warm glow (negative effects would indicate the presence of warm glow).

(a) Effect of a *Donation lottery* treatment on support for the Global Climate Scheme. (Questions 27-28)

(b) Effect of information about ongoing global redistribution initiatives on the share of plausible global policies supported. (Questions 36-38)

Figure S67: [Weighted by vote] Relative support for plausible global redistribution policies (Percentage of *Somewhat* or *Strongly* support among non-*Indifferent* responses). (Question 38).

	All	Europe	France	Germany	Italy	Poland	Spain	United Kingdom	Switzerland	Japan	Saudi Arabia	USA
Minimum tax of 2% on billionaires' wealth, in voluntary countries	81	84	85	82	87	80	82	86	79	81	86	76
